SUMMARY

Full Stack Developer with hands-on experience building responsive web applications using React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, and Tailwind CSS, plus backend experience on .NET, Laravel, and Vue.js. Contributed to five production platforms (Dorosak, Al-Hawkama, Taj Mahal POS, Ranaura, NexStock), building reusable components, integrating RESTful APIs, and delivering POS/inventory systems with role-based access control within a Scrum team.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Vue.js

UI Development: Responsive Web Design, Mobile-First Development, Reusable Components, Cross-Browser Compatibility, UI/UX Implementation

Backend & Database: Laravel, .NET MVC, Node.js, Express.js, PHP, MySQL

API & Data: RESTful APIs, Axios, JSON, Frontend-Backend Integration

Systems: POS Systems, Inventory Management, RBAC, POS Peripherals (Thermal Printers, Barcode Scanners)

Server & System Admin: Server & System Administration, PowerShell, Laravel, Device Drivers, Performance Monitoring, Troubleshooting

Tools & Practices: Git, GitHub, Visual Studio Code, Visual Studio, Agile/Scrum, Code Reviews

EXPERIENCE

Grids Apps LLC — Ramallah, Palestine

Full Stack Developer | May 2026 – Present

- Delivered responsive frontend features across 5 production platforms using React.js, Next.js, JavaScript, HTML5, and CSS3, shipping UI to real end users.
- Extended into full-stack delivery by building and modifying backend functionality on a .NET-based governance platform (Al-Hawkama), owning features end to end instead of frontend only.
- Built and maintained a shared library of ~20 reusable React.js and Next.js components, cutting duplicate frontend work and speeding up delivery of new pages across the 5 platforms.
- Translated UI/UX designs and business requirements into pixel-accurate, responsive pages working consistently across desktop, tablet, and mobile.
- Integrated interfaces with RESTful APIs and backend services to render dynamic data and support real-time user interactions.
- Diagnosed and resolved layout, form, navigation, and responsiveness issues, improving stability and usability across all screen sizes.
- Collaborated within a 5-person Scrum team, taking part in sprints, code reviews, and Git/GitHub version control to deliver features on schedule.

Full Stack Developer Intern | February 2026 – May 2026

- Trained on the company production stack (React.js, Next.js, and .NET), contributing to real platform features under senior developer guidance.
- Built responsive UI components and fixed layout, form, and responsiveness issues, earning a full-time Full Stack Developer offer at the end of the internship.

Paltel Group — Nablus, Palestine

Technical Support Intern | January 2021 – January 2022

- Diagnosed and resolved 25–50 telecom service, connectivity, and technical support tickets daily via phone and in-person channels, independently closing over 90% of cases without escalation.

PROJECTS

Dorosak Educational Platform dorosak.com

Improved UI/UX using React.js, Next.js, reusable components, and responsive design to enhance consistency across educational modules.

Al-Hawkama Governance Platform wssd.mosd.gov.ps

Built and modified backend functionality on a .NET-based governance platform, and enhanced layouts, forms, navigation, and mobile responsiveness on the frontend.

Taj Mahal Inventory & POS Management System taj-mahal.online

Customized a Laravel/Vue.js POS platform with sales, purchasing, inventory, supplier/customer, payment, shipment, barcode, and role-based access control (RBAC) modules and a reporting-driven admin dashboard.

Ranaura QR Menu ranauramenu.com

Built a responsive digital restaurant menu with React.js/Next.js, letting customers browse categorized items via QR code with a clean, mobile-first experience.

NexStock SaaS Landing Page nexstock.co

Developed and refined a bilingual SaaS landing page focusing on responsive UI, RTL/LTR language support, brand consistency, and polished dashboard-style product previews.

PERSONAL PROJECTS

Addha addha.vercel.app

Cross-platform mobile app built with React Native (Expo) and TypeScript.

Alazem Car Rental alazim-rent.vercel.app

Car rental platform built with TanStack Start and Supabase, featuring live availability, date search, filtering, and online booking.

SERVER & SYSTEM ADMINISTRATION

- Configured and managed local servers and workstations.
- Monitored server hardware specifications, CPU, memory, and system performance.
- Used PowerShell for server management, remote access, and system operations.
- Installed and configured software, services, and development environments.
- Installed and configured POS peripherals, including thermal receipt printer drivers and barcode scanners.
- Managed local databases and server environments using MySQL, Laravel, and Laragon.
- Troubleshot server, network, database, and hardware-related issues.
